

Non-Motor Symptom Questionnaire (NMS-Quest)(PD-NMS)

Availability	Please visit this website for more information about the instrument: PLEASE CLICK HERE FOR MORE INFORMATION
Classification:	Supplemental
Short Description of Instrument:	The Non-motor Symptoms Questionnaire (NMS-Quest) (PD-NMS) is a self-completed patient questionnaire with 30 qualitative questions designed to identify the presence but not the severity of non-motor symptoms. The NMS-Quest covers all important non-motor symptoms of PD.
Scoring:	Each of the 30 questions presents a problem that patients may have experienced within the past month. The patients may give an answer of “yes”, “no”, or “don’t know” to each of the 30 questions.
